

Capability Statement

Bedrock Corp Pty Ltd provides disciplined, real-time wellsite geological support for exploration, appraisal and development wells. The focus is operational clarity — integrating cuttings, gas, LWD data and drilling context into concise communication that supports informed decision-making at the rig.

Core Services

- Real-time Wellsite Geology Coverage
- Formation Evaluation (GR, Resistivity, Density, Sonic)
- Gas Monitoring and Show Interpretation
- Pore Pressure Trend Awareness & Mud Weight Context
- Geosteering & Reservoir Placement Support
- Coring and Wireline Supervision & QC
- Daily Reporting and End-of-Well Documentation

Operational Exposure

- Perth Basin, Cooper Basin, NW Shelf, Carnarvon & Bonaparte Basins
- International: Qatar, Bahrain, Myanmar (Deepwater), UK North Sea
- Vertical, Deviated & Horizontal Wells
- Extended Reach, HP/HPHT & Deepwater Environments
- Clastic, Carbonate & Volcanic Systems

Operators Supported

- ConocoPhillips
- Beach Energy
- Mitsui E&P
- Mineral Resources (MinRes)
- Strike Energy
- Woodside Energy
- BHP Billiton
- Maersk Oil
- Tatweer Petroleum
- ExxonMobil
- Vintage Energy

Leadership

Bedrock Corp Pty Ltd is led by Steve Phillips, Principal Wellsite Geologist. Industry exposure dates to 1984, with wellsite geology roles since 2007 across exploration, appraisal and development programs. The approach remains consistent: evidence-based interpretation, calm operational communication, and disciplined geological support.
